

TouchOSC manual

Please refer to TouchOSC app section in the Ltcomposer manual on support page:

<https://www.lighttoys.cz/support/#manuals>

Around page 38

Then refer to this manual how to send the template to your mobile touch OSC:

Quick Guide: Using TouchOSC (Mobile + Desktop)

1. Install TouchOSC (3rd-party app - paid on mobile)

- **Mobile app:** Download from App Store (iOS) or Google Play (Android).
- **Desktop editor:** Download from hexler.net/touchosc and install on your computer.

2. Open Template in Desktop App

1. Launch **TouchOSC Editor** on your computer.
2. Open the provided **template file (.tosc)**.

3. Transfer Template to Mobile

Option A – WiFi Sync

1. Make sure mobile and computer are on the **same WiFi network**.
2. On the mobile app, go to **Settings** → **Layouts** → **Add** → **Editor**.

3. In the desktop app, click **Upload Layout**.
4. The layout appears on your mobile device.

Option B – File Transfer

1. Copy the **.tosc template file** to your phone (via AirDrop, email, cloud storage, or USB).
 2. Open it directly on your mobile → TouchOSC will import it automatically.
-

4. Load the Template on Mobile

1. Open TouchOSC mobile app.
 2. Go to **Settings** → **Layouts**.
 3. Select your imported template.
 4. Return to main screen – your custom controls are now active.
-

5. Connect to Your Software/Hardware

- Go to **Settings** → **Connections** on mobile.
 - Set up **OSC target IP + port** (usually your computer's IP).
 - Match the settings in your music software or lighting control software.
-

✅ That's it – your template is ready to use!
